

SEPLAT Technical Trainee Programme (Sample)

HCP Assessment Practice Questions

Numerical Reasoning

1. What is 15% of 420?

A. 60
B. 63
C. 65
D. 70

Answer: B

2. A well produces 2,500 barrels of oil per day. If production declines by 8% annually, what will be the production rate after one year?

A. 2,300 bpd
B. 2,250 bpd
C. 2,400 bpd
D. 2,200 bpd

Answer: A

3. If 5 drilling rigs can complete 15 wells in 30 days, how many wells can 8 rigs complete in 45 days?

A. 30
B. 36
C. 42
D. 48

Answer: B

4. A gas pipeline has a flow rate of 500,000 standard cubic feet per day (SCFD). What is the flow rate in MMSCFD?

A. 0.5
B. 5.0
C. 50
D. 500

Answer: A

5. The ratio of water to oil in a well is 3:7. If the total fluid produced is 1,000 barrels, how many barrels are oil?

A. 300

- B. 500
- C. 700
- D. 750

Answer: C

6. A drill bit costs ₦450,000 and has a useful life of 90 drilling hours. What is the cost per drilling hour?

- A. ₦5,000
- B. ₦4,500
- C. ₦5,500
- D. ₦6,000

Answer: A

7. If the specific gravity of a crude oil sample is 0.85, what is its API gravity? (API = $(141.5/SG) - 131.5$)

- A. 32.5
- B. 35.0
- C. 38.5
- D. 40.0

Answer: B

8. A reservoir has an area of 500 acres and an average thickness of 40 feet. What is the volume in acre-feet?

- A. 12,500
- B. 15,000
- C. 20,000
- D. 25,000

Answer: C

9. If a pump moves 300 barrels per hour and operates for 18 hours daily, how many barrels are pumped in a 30-day month?

- A. 162,000
- B. 150,000
- C. 180,000
- D. 200,000

Answer: A

10. An investment of ₦5,000,000 in a gas plant yields a return of ₦750,000 annually. What is the percentage return on investment?

- A. 12%

- B. 15%
- C. 18%
- D. 20%

Answer: B

11. A 5,000-foot well costs ₦50,000,000 to drill. What is the cost per foot?

- A. ₦8,000
- B. ₦10,000
- C. ₦12,000
- D. ₦15,000

Answer: B

12. If 1 barrel = 42 US gallons, how many gallons are in 250 barrels?

- A. 8,500
- B. 9,500
- C. 10,500
- D. 11,500

Answer: C

13. A gas well produces at a rate that declines by 30% per year. If the initial rate is 400 MMSCFD, what is the rate after 2 years?

- A. 160 MMSCFD
- B. 196 MMSCFD
- C. 200 MMSCFD
- D. 240 MMSCFD

Answer: B

14. What is 333 multiplied by 135?

- A. 43,923
- B. 44,955
- C. 45,000
- D. 46,323

Answer: B

15. Simplify: $(86 \times 207) - (86 \times 107)$

- A. 6,400
- B. 7,800
- C. 8,600
- D. 9,200

Answer: C

16. Which fraction is larger than $\frac{3}{5}$?

- A. $\frac{1}{2}$
- B. $\frac{39}{50}$
- C. $\frac{7}{25}$
- D. $\frac{3}{10}$

Answer: B

17. In a class with x girls and y boys, what fraction of the class is girls?

- A. $\frac{y}{(x+y)}$
- B. $\frac{x}{y}$
- C. $\frac{x}{(x+y)}$
- D. $\frac{y}{x}$

Answer: C

18. If a number squared minus 11^3 equals 6,590, what is the number?

- A. 36
- B. 58
- C. 89
- D. 48

Answer: C

19. A pipeline is 120 kilometers long. If 35% of it needs replacement, how many kilometers need replacement?

- A. 35 km
- B. 40 km
- C. 42 km
- D. 45 km

Answer: C

20. The pressure at a depth of 1,000 feet in a well is approximately 433 psi. What is the pressure at 2,500 feet?

- A. 866 psi
- B. 1,000 psi
- C. 1,082.5 psi
- D. 1,200 psi

Answer: C

Verbal Reasoning

21. Choose the word that best completes the sentence: The oil spill had a _____ effect on marine life in the region.

- A. beneficial
- B. negligible
- C. devastating
- D. minimal

Answer: C

22. Select the synonym for "dormant" as used in "a dormant oil well":

- A. active
- B. inactive
- C. productive
- D. flowing

Answer: B

23. Which word is most opposite in meaning to "flammable"?

- A. combustible
- B. volatile
- C. non-flammable
- D. ignitable

Answer: C

24. Fill in the blank: The drilling team worked _____ to reach the target depth before the deadline.

- A. diligently
- B. carelessly
- C. slowly
- D. reluctantly

Answer: A

25. Choose the sentence that is grammatically correct:

- A. He has been working on the rig for five years.
- B. He have been working on the rig for five years.
- C. He has been worked on the rig for five years.
- D. He is been working on the rig for five years.

Answer: A

26. "The reservoir pressure has declined significantly." The word "declined" means:

- A. increased
- B. remained the same
- C. decreased

D. fluctuated

Answer: C

27. Select the antonym of "permeable":

A. porous

B. absorbent

C. impermeable

D. penetrable

Answer: C

28. Fill in the blank with the correct tense: He _____ a fortune by writing various kinds of technical books.

A. did making

B. would made

C. is making

D. will made

Answer: C

29. Identify the tense: "He will have been working for four hours."

A. Past Perfect Continuous

B. Present Perfect Continuous

C. Future Perfect

D. Future Perfect Continuous

Answer: D

30. Identify the tense: "John had been working in a bank for some years."

A. Simple past

B. Past continuous

C. Past perfect continuous

D. Past perfect

Answer: C

31. Choose the correct word to fill the blank: I _____ with my sister _____ I find an apartment.

A. am living, until

B. have been living, since

C. had lived, since

D. had been living, since

Answer: A

32. The word "derrick" refers to which of the following?

- A. A type of pump
- B. The main structure of a drilling rig
- C. A safety device
- D. A measuring instrument

Answer: B

33. "Roughneck" is a nickname for workers who work on which area of a drilling rig?

- A. The office
- B. The drill floor
- C. The kitchen
- D. The warehouse

Answer: B

34. "Sour gas" refers to natural gas that contains which component?

- A. Carbon dioxide
- B. Oxygen
- C. Hydrogen sulfide
- D. Methane

Answer: C

35. Choose the best word to fill the blank: The well was _____ after producing for 20 years.

- A. drilled
- B. abandoned
- C. constructed
- D. completed

Answer: B

36. What does the acronym "FPSO" stand for?

- A. Floating Production, Storage, and Offloading
- B. Floating Petroleum Storage Operation
- C. Fixed Production Storage Offshore
- D. Fast Pipeline Storage Operation

Answer: A

37. The term "kick" in drilling operations refers to:

- A. A routine safety drill
- B. Pressure overcoming hydrostatic pressure of drilling fluid
- C. Kicking equipment into place

D. Starting the drilling process

Answer: B

38. Select the word closest in meaning to "extraction":

A. Injection

B. Removal

C. Addition

D. Storage

Answer: B

39. "The company is looking for candidates with strong technical fundamentals and analytical capability." What is the best synonym for "analytical"?

A. Creative

B. Logical

C. Artistic

D. Emotional

Answer: B

40. Which word is the odd one out?

A. Reservoir

B. Formation

C. Rock

D. Microscope

Answer: D

Abstract/Logical Reasoning

41. What comes next in the sequence: 2, 6, 12, 20, 30, ?

A. 38

B. 40

C. 42

D. 44

Answer: C

42. If all A are B, and all B are C, which statement is true?

A. All C are A

B. Some C are A

C. All A are C

D. No A are C

Answer: C

43. What number comes next: 3, 9, 27, 81, ?

- A. 162
- B. 216
- C. 243
- D. 324

Answer: C

44. Which shape would complete the sequence: Circle, Triangle, Square, ?

- A. Rectangle
- B. Pentagon
- C. Hexagon
- D. All of the above

Answer: B

45. If you rearrange the letters "CIFAIPC" you get the name of a:

- A. Country
- B. City
- C. Ocean
- D. Chemical

Answer: D

46. Select the word that does not belong to the group:

- A. Drill bit
- B. Derrick
- C. Pump
- D. Telephone

Answer: D

47. What is the missing number: 4, 10, 22, 46, ?

- A. 70
- B. 82
- C. 94
- D. 102

Answer: C

48. If a well produces twice as much as another, and the total production is 1,500 barrels, how much does the smaller well produce?

- A. 1,000 barrels
- B. 750 barrels
- C. 500 barrels

D. 375 barrels

Answer: C

49. Continue the pattern: 1, 1, 2, 3, 5, 8, 13, ?

A. 18

B. 20

C. 21

D. 23

Answer: C

50. Which of the following is not a petroleum engineering term?

A. Porosity

B. Permeability

C. Evaporation

D. Saturation

Answer: C

Oil & Gas Technical Knowledge

51. What type of rock favours petroleum formation?

A. Igneous rock

B. Metamorphic rock

C. Sedimentary rock

D. Volcanic rock

Answer: C

52. Which of the following is an artificial lift method?

A. Natural flow

B. Gas lift system

C. Gravity flow

D. Artesian flow

Answer: B

53. What is the name of the equipment used to control well pressure?

A. Christmas tree

B. Downhole safety valve

C. Surface safety valve

D. All of the above

Answer: D

54. The main reason for using a gas lift system is to:

A. Reduce pressure in the production tubing

- B. Increase reservoir pressure
- C. Bring the well back into production
- D. Reduce gas bubbles in the tubing

Answer: C

55. In well completion, what is the purpose of a production packer?

- A. Protect the casing
- B. Isolate zones
- C. Separate multiple zones
- D. All of the above

Answer: D

56. What is the full form of MMSCFD?

- A. Multi Million Standard Cumulative Flow Per Day
- B. Million Standard Cubic Feet Per Day
- C. Million Standard Cumulative Flow Per Day
- D. Multi Million Standard Cubic Feet Per Day

Answer: B

57. One standard barrel (bbl) is equal to how many US gallons?

- A. 19
- B. 42
- C. 55
- D. 26

Answer: B

58. Which test is considered the first test after drilling an exploration oil well?

- A. Production test
- B. Drill Stem Test (DST)
- C. Formation test
- D. Injectivity test

Answer: B

59. In drilling operations, what does "overbalanced mud building filter cake" serve as?

- A. Primary barrier
- B. Secondary barrier
- C. Tertiary barrier
- D. No barrier function

Answer: B

60. What is the limitation of using multiple string completion?

- A. Packers cannot be used
- B. Cannot produce oil and gas from the same well
- C. Limited tubing size may restrict production
- D. All of the above

Answer: C

61. The completion type that allows more than one zone to produce from one tubing is called:

- A. Commingled completion
- B. Sequential zonal completion
- C. Multi-zone completion
- D. Dual completion

Answer: A

62. When should tubingless completion be proposed?

- A. When high production rates are required
- B. When high surface pressure is required
- C. When low production rates are required
- D. None of the above

Answer: A

63. The productivity index is the relationship between:

- A. Pressure and temperature
- B. Production rate and pressure
- C. Pressure and time
- D. Temperature and volume

Answer: B

64. When is artificial lift needed?

- A. If reservoir pressure is low
- B. If the main drive mechanism is water
- C. During secondary recovery
- D. All of the above

Answer: D

65. What is the primary function of a heater treater in oil production?

- A. Heating crude oil to get all components
- B. Removing heavy components
- C. Separating water from crude oil

D. Separating lighter gases

Answer: C

66. Directional drilling refers to the act of:

- A. Drilling vertically
- B. Deviating the wellbore in a desired direction
- C. Drilling multiple wells from one platform
- D. Reducing wellbore diameter

Answer: B

67. Fluids movement in porous media within a reservoir is governed by which forces?

- A. Viscous, hydraulic and gravitational
- B. Viscous, capillary and gravitational
- C. Viscous, capillary and hydraulic
- D. Hydraulic, capillary and gravitational

Answer: B

68. Injection of pressurized gas or water to increase production is a form of:

- A. Primary recovery
- B. Secondary recovery
- C. Tertiary recovery
- D. None of the above

Answer: B

69. What test is used to find the parting pressure of a formation?

- A. Pulse test
- B. Build up test
- C. Step rate test
- D. Injectivity test

Answer: C

70. Carbon dioxide flooding is classified under which Enhanced Oil Recovery category?

- A. Chemical
- B. Thermal
- C. Miscible
- D. None of the above

Answer: C

71. What is the purpose of a drilling fluid? (Mud)

- A. To cool the drill bit
- B. To remove cuttings

- C. To maintain hydrostatic pressure
- D. All of the above

Answer: D

72. Slotted liner is used to prevent:

- A. Control of a single interval
- B. Hole collapse
- C. Formation damage
- D. None of the above

Answer: B

73. Well completion operations include:

- A. Production packer installation
- B. Christmas tree installation
- C. Tubing string installation
- D. All of the above

Answer: D

74. What is the advantage of a perforated liner?

- A. Log interpretation is critical
- B. Reduced wellbore diameter
- C. Production continues without sand or formation damage
- D. None of the above

Answer: C

75. The gathering system consists of the following except?

- A. Wellhead
- B. Flowline
- C. Separator
- D. Transformer

Answer: D

76. What is used to prevent water and gas coning?

- A. Select perfect places for new perforation
- B. Go to another formation
- C. Re-completion
- D. Produce at the optimum rate

Answer: D

77. Heavy oil is typically produced using:

- A. Natural flow

- B. Cavitation pump
- C. Jet pump
- D. Hydraulic pump

Answer: B

78. Cased hole completion is commonly used in which reservoir type?

- A. Hard reservoir rock
- B. Carbonate rock
- C. Sandstone reservoir
- D. All of the above

Answer: C

79. What is another name for a well log?

- A. Drilling log
- B. Formation log
- C. Borehole log
- D. Depth log

Answer: C

80. What is the purpose of a test separator in production testing?

- A. To separate water from oil
- B. To measure flow from individual wells
- C. To heat crude oil
- D. To store produced oil

Answer: B

81. The production system consists of the following except:

- A. Surface facilities
- B. Reservoir
- C. Transformer
- D. Wellbore

Answer: C

82. Inflow performance determines:

- A. Production-related pressure
- B. Reservoir compilation
- C. Different reservoir pressure
- D. Production decline minimization

Answer: A

83. The completion interface is between the reservoir and:

- A. Surface production facilities
- B. Drilling equipment
- C. Pipeline network
- D. Refinery

Answer: A

84. Does well completion always have tubing?

- A. Yes
- B. No
- C. Sometimes
- D. Not specified

Answer: B

85. What acts as a secondary barrier in a naturally flowing well?

- A. Downhole safety valve
- B. Wellhead and choke valve
- C. Packer
- D. SSSV

Answer: A

86. What is the preferred objective of an oil and gas well?

- A. More production
- B. Establish effective flow communication between wellbore and formation
- C. Obtain clean
- D. All of the above

Answer: B

87. Horizontal oil wells are drilled in:

- A. Fractured basement reservoir
- B. All reservoirs
- C. Sandstone reservoir
- D. Carbonate reservoir

Answer: A

88. What are the applications of production packers?

- A. Casing protection
- B. Separation of multiple zones
- C. Zone isolation

D. All of the above

Answer: D

89. Gas and water coning is a term that describes:

- A. Movement of water and gas to the wellbore
- B. The shape of the well
- C. A type of drilling rig
- D. Production equipment

Answer: A

90. The first step after an oil spill occurs should be to:

- A. Call the EPA
- B. Cover it with dirt
- C. Initiate containment measures
- D. Wait for instructions

Answer: C

91. What is the most dangerous to human health among the following?

- A. Salt water
- B. H_2S
- C. CO_2
- D. SO_2

Answer: B

92. A berm is used for:

- A. Scenic beauty
- B. Fluid containment
- C. Stopping vehicles
- D. Topographical formation

Answer: B

93. What is the purpose of deliverability testing in gas wells?

- A. Measure production capabilities during high demand
- B. Measure production capabilities under specific reservoir conditions
- C. Measure production capabilities during winter
- D. Measure production under specific conditions of reservoir and bottom-hole flowing pressures

Answer: D

94. Why is FPSO better than an offshore platform?

- A. Abandonment costs are less

- B. Can evade harsh weather
- C. Can move from field to field
- D. All of the above

Answer: D

95. Water content in natural gas is removed through:

- A. Electric heater
- B. Dissolving water vapour using chemicals
- C. Gas dehydration using Glycol
- D. Addition of Mono Ethylene Glycol

Answer: C

96. If API gravity of hydrocarbon liquid increases, what happens to specific gravity?

- A. Increases
- B. Decreases
- C. Remains the same
- D. Depends on temperature

Answer: B

97. The barge type drilling rig is classified as:

- A. Conventional land rig
- B. Floating offshore rig
- C. Conventional mobile rig
- D. Bottom supported offshore rig

Answer: D

98. At what water depth are semi-submersible drilling rigs used?

- A. 20,000 ft
- B. 1,200 ft
- C. 12,000 ft
- D. 32,000 ft

Answer: C

99. Compositional modelling is generally not applicable for:

- A. Gas condensate recovery estimation
- B. Volatile oil recovery estimation
- C. Carbon dioxide flooding effectiveness
- D. Polymer flood oil recovery

Answer: D

100. What is the full form of RFT?

- A. Reservoir Formation Testing
- B. Repeat Formation Test
- C. Repeat Flow Test
- D. Reservoir Flow Testing

Answer: B

Situational Judgment & Workplace Scenarios

101. You observe a safety violation on the rig. What should you do?

- A. Ignore it if no one is watching
- B. Report it to your supervisor immediately
- C. Wait to see if it becomes a problem
- D. Handle it yourself without telling anyone

Answer: B

102. A colleague is struggling with a task. What should you do?

- A. Let them figure it out on their own
- B. Offer to help them
- C. Tell the supervisor they can't do it
- D. Do the task for them without asking

Answer: B

103. What is the most important priority in oil and gas operations?

- A. Production volume
- B. Cost reduction
- C. Safety
- D. Speed

Answer: C

104. Your supervisor asks you to perform a task that seems unsafe. What should you do?

- A. Do it anyway, they are the boss
- B. Ask questions and request clarification
- C. Refuse immediately
- D. Find someone else to do it

Answer: B

105. In a team meeting, you disagree with a proposal. What should you do?

- A. Remain quiet
- B. Express your concerns respectfully

- C. Agree to avoid conflict
- D. Argue aggressively

Answer: B

106. If you see a co-worker not wearing proper PPE, what should you do?

- A. Ignore it
- B. Report it to the safety officer
- C. Remind them of the requirement
- D. Let the supervisor handle it

Answer: C

107. Your team has a tight deadline, what is your best response?

- A. Work as efficiently as possible while maintaining quality
- B. Rush through the work to meet the deadline
- C. Ask for more time
- D. Stop and ask for help immediately

Answer: A

108. In the oil and gas industry, what is the primary role of a technical trainee?

- A. To manage projects
- B. To learn and develop technical skills
- C. To supervise senior staff
- D. To handle public relations

Answer: B

109. A situation arises where you need to make a decision but lack complete information. What should you do?

- A. Make a guess and hope for the best
- B. Gather as much relevant information as possible then decide
- C. Wait until you have every possible piece of information
- D. Ask someone else to make the decision

Answer: B

110. You notice a minor issue that could lead to a major problem later. What should you do?

- A. Report it immediately
- B. Wait and see if it worsens
- C. Fix it yourself if you can
- D. Both A and C are appropriate

Answer: D

111. How would you handle working in a multicultural team environment?

- A. Stick to your own cultural practices
- B. Be open, respectful, and learn from others
- C. Avoid interaction
- D. Only work with people who share your background

Answer: B

112. Your work requires you to be on the rig for an extended period. What is the best way to maintain health and effectiveness?

- A. Ignore rest and work continuously
- B. Prioritize sleep, nutrition, and exercise
- C. Socialize with colleagues in the evenings
- D. Focus only on work and nothing else

Answer: B

113. When learning a new technical procedure, what is the best approach?

- A. Memorize steps without understanding
- B. Ask questions, practice, and learn the principles
- C. Watch others and learn passively
- D. Read the manual once and start working

Answer: B

114. You notice that an incident report was filed inaccurately. What should you do?

- A. Ignore it
- B. Correct the record and inform the appropriate person
- C. Wait for someone else to notice
- D. File a separate report without mentioning the discrepancy

Answer: B

115. In a fast-paced environment, what quality is most essential for success?

- A. Speed
- B. Adaptability
- C. Perfectionism
- D. Independence

Answer: B

116. A vendor offers you a gift. What should you do?

- A. Accept it as a friendly gesture
- B. Reject it and report the offer to management
- C. Accept it but don't tell anyone

D. Wait and see if others are accepting gifts

Answer: B

117. What is the best way to build a good working relationship with your supervisor?

- A. Always agree with them
- B. Keep them informed of your progress and ask for feedback
- C. Avoid them unless necessary
- D. Complete tasks without any communication

Answer: B

118. What should you do if you make a mistake in a critical task?

- A. Try to hide it
- B. Admit it promptly and work to correct it
- C. Blame someone else
- D. Wait to see if anyone notices

Answer: B

119. When working on a complex project, the most effective strategy is:

- A. Start working immediately without planning
- B. Create a plan, set milestones, and execute
- C. Wait for instructions on every step
- D. Work in isolation without collaboration

Answer: B

120. What is your approach to continuous learning?

- A. Learn only what is required for your job
- B. Actively seek out new information and skills
- C. Rely on your current knowledge
- D. Learn from experience only

Answer: B

121. A colleague takes credit for your work. What should you do?

- A. Let it go
- B. Speak to the colleague privately
- C. Immediately confront them publicly
- D. Go directly to the supervisor without talking to the colleague

Answer: B

122. When asked to work on something outside your area of expertise, what should you do?

- A. Refuse the task

- B. Accept the task and attempt to learn what is needed
- C. Do it poorly and hope for the best
- D. Ask someone else to do it for you

Answer: B

123. What is the best way to manage stress in a demanding technical role?

- A. Work longer hours to catch up
- B. Practice good time management and seek support when needed
- C. Ignore the stress and push through
- D. Reduce work output

Answer: B

124. You have multiple deadlines approaching. What should you do?

- A. Prioritize tasks and manage your time effectively
- B. Do them all at the same time
- C. Work on the easiest ones first
- D. Ask others to complete some of your tasks

Answer: A

125. What does it mean to be "proactive" in a work environment?

- A. Waiting for instructions
- B. Anticipating needs and taking initiative
- C. Completing tasks as assigned
- D. Following procedures exactly

Answer: B

126. Why is teamwork important in the oil and gas industry?

- A. It makes work more enjoyable
- B. It ensures safety and efficiency
- C. It reduces training requirements
- D. It allows for less responsibility

Answer: B

127. How would you handle working night shifts on a rig?

- A. Sleep during the day and maintain regular rest cycles
- B. Stay awake and try to function
- C. Rely on caffeine to stay alert
- D. Avoid night shifts entirely if possible

Answer: A

128. You see a potential safety hazard that hasn't been reported. What should you do?

- A. Report it immediately to the safety team
- B. Wait to see if it becomes dangerous
- C. Fix it yourself
- D. Tell a colleague and move on

Answer: A

129. What should a trainee do to make a positive impression?

- A. Arrive late but work hard
- B. Show enthusiasm, ask questions, and demonstrate willingness to learn
- C. Only speak when spoken to
- D. Focus solely on their own tasks

Answer: B

130. What is the most important skill to develop during a graduate trainee program?

- A. Technical competence and professionalism
- B. Speed in completing tasks
- C. Ability to avoid responsibility
- D. Memorization of procedures

Answer: A

General Knowledge & Current Affairs

131. Which of the following is a major oil and gas producing region in Nigeria?

- A. Niger Delta
- B. Jos Plateau
- C. Obudu Plateau
- D. Mambilla Plateau

Answer: A

132. OPEC stands for:

- A. Organization of Petroleum Exporting Countries
- B. Organization of Petroleum Energy Countries
- C. Organization of Petroleum Exporting Corporations
- D. Organization of Petroleum Energy Corporations

Answer: A

133. What is the full meaning of "NCDMB"?

- A. Nigerian Content Development and Monitoring Board
- B. Nigerian Corporation for Development of Maritime Board

- C. National Content Development and Management Board
- D. Nigerian Content Development and Management Bureau

Answer: A

134. Which of these is a major oil and gas company in Nigeria?

- A. Seplat Energy
- B. Jumia
- C. MTN
- D. Dangote Cement

Answer: A

135. The main regulatory body for the oil and gas industry in Nigeria is:

- A. Nigerian National Petroleum Corporation (NNPC)
- B. Nigerian Communications Commission (NCC)
- C. National Electricity Regulatory Commission (NERC)
- D. Nigerian Copyright Commission (NCC)

Answer: A

136. What is the full meaning of "LNG"?

- A. Liquid Natural Gas
- B. Light Natural Gas
- C. Liquefied Natural Gas
- D. Low Natural Gas

Answer: C

137. Which country is the largest oil producer in Africa?

- A. South Africa
- B. Nigeria
- C. Angola
- D. Egypt

Answer: B

138. What is "Gas Flaring"?

- A. The process of burning natural gas
- B. The process of releasing gas into the atmosphere
- C. The process of compressing gas
- D. The process of liquefying gas

Answer: A

139. The "Energy Transition" refers to:

- A. Moving from fossil fuels to renewable energy sources

- B. Transitioning from oil to gas
- C. Shifting from renewable to fossil fuels
- D. Moving to nuclear energy

Answer: A

140. What is the headquarters of OPEC?

- A. Riyadh, Saudi Arabia
- B. Vienna, Austria
- C. Lagos, Nigeria
- D. Houston, USA

Answer: B

141. Which of the following is NOT a renewable energy source?

- A. Solar
- B. Wind
- C. Natural Gas
- D. Hydroelectric

Answer: C

142. What is the current CEO of the Nigerian National Petroleum Company (NNPC) Limited?

- A. Mele Kyari
- B. Godwin Emefiele
- C. Amina Mohammed
- D. Ngozi Okonjo-Iweala

Answer: A

143. "Nigerian Content" policy in the oil and gas sector aims to:

- A. Increase foreign participation
- B. Promote local content and participation
- C. Reduce oil production
- D. Increase gas flaring

Answer: B

144. The Paris Agreement primarily concerns:

- A. Climate change and carbon emissions
- B. Trade agreements
- C. Nuclear non-proliferation
- D. Human rights

Answer: A

145. What is "ESG" in the context of oil and gas companies?

- A. Energy, Security, and Governance
- B. Environmental, Social, and Governance
- C. Economic, Social, and Growth
- D. Energy, Society, and Government

Answer: B

146. Which of the following is a common benchmark for crude oil pricing?

- A. Brent Crude
- B. Lagos Crude
- C. Asian Crude
- D. Pacific Crude

Answer: A

147. What is the full meaning of "EIA"?

- A. Environmental Impact Assessment
- B. Energy Impact Analysis
- C. Economic Impact Assessment
- D. Environmental Impact Analysis

Answer: A

148. What is the term for the natural process of oil formation?

- A. Photosynthesis
- B. Diagenesis
- C. Catagenesis
- D. Metamorphosis

Answer: C

149. The term "Upstream" in oil and gas refers to:

- A. Exploration and production
- B. Transportation and storage
- C. Refining and processing
- D. Marketing and distribution

Answer: A

150. The term "Downstream" in oil and gas refers to:

- A. Exploration and production
- B. Refining and marketing
- C. Drilling operations

D. Well completion

Answer: B

151. What is "Net Zero" in the energy context?

- A. Achieving balance between carbon emissions and removals
- B. Producing zero oil
- C. Having zero energy consumption
- D. Generating zero profit

Answer: A

152. Which of the following is a major Nigerian gas project?

- A. Ajaokuta-Kaduna-Kano (AKK) pipeline
- B. Lagos-Ibadan road
- C. Abuja-Kano rail
- D. Second Niger Bridge

Answer: A

153. The Department of Petroleum Resources (DPR) is now known as:

- A. Nigerian Petroleum Regulatory Agency
- B. Nigerian Upstream Regulatory Commission and Nigerian Midstream and Downstream Regulatory Authority
- C. Nigerian Petroleum Commission
- D. Oil and Gas Regulatory Authority

Answer: B

154. What is the primary greenhouse gas produced from burning fossil fuels?

- A. Carbon dioxide
- B. Methane
- C. Nitrous oxide
- D. Sulphur dioxide

Answer: A

155. The "Decade of Gas" in Nigeria refers to:

- A. 2020-2030
- B. 2021-2030
- C. 2015-2025
- D. 2010-2020

Answer: B

156. Which of the following is a major international oil company (IOC) operating in Nigeria?

- A. Shell
- B. MTN
- C. Globacom
- D. Dangote

Answer: A

157. What is "SWAMP" in the Nigerian oil and gas context?

- A. South West Area Mature Ponds
- B. Shallow Water Area/Marginal Ponds
- C. South West Atlantic Marginal Project
- D. Shallow Water Marginal Project

Answer: B

158. The "Petroleum Industry Act" (PIA) was signed into law in:

- A. 2021
- B. 2019
- C. 2020
- D. 2022

Answer: A

159. Which of the following is a type of Enhanced Oil Recovery (EOR)?

- A. Thermal recovery
- B. Chemical flooding
- C. Miscible gas injection
- D. All of the above

Answer: D

160. The acronym "GMD" in Seplat Energy refers to:

- A. General Managing Director
- B. Group Managing Director
- C. Global Management Director
- D. Gas Marketing Director

Answer: B

161. Which of these is a major natural gas processing plant in Nigeria?

- A. Bonny LNG
- B. Kaduna Refinery
- C. Warri Refinery
- D. Port Harcourt Refinery

Answer: A

162. What is "Carbon Capture and Storage" (CCS)?
- A. A process of capturing carbon dioxide emissions and storing them underground
 - B. A process of capturing carbon dioxide and releasing it into the atmosphere
 - C. A method of increasing carbon emissions
 - D. A type of renewable energy

Answer: A

163. The "Niger Delta" is significant for which of the following?
- A. Agriculture
 - B. Oil and gas reserves
 - C. Tourism
 - D. Manufacturing

Answer: B

164. What is "fracking"?
- A. A method of drilling wells
 - B. A hydraulic fracturing technique to extract oil and gas
 - C. A method of refining crude oil
 - D. A type of pipeline construction

Answer: B

165. Which of the following is a byproduct of crude oil refining?
- A. Petrol
 - B. Diesel
 - C. Kerosene
 - D. All of the above

Answer: D

166. What is the full meaning of "PSA" in the oil and gas industry?
- A. Production Sharing Agreement
 - B. Petroleum Safety Authority
 - C. Production Service Agreement
 - D. Petroleum Sharing Agreement

Answer: A

167. Which of the following is a major oil field in Nigeria?
- A. Oando
 - B. Bonny
 - C. Escravos

D. All of the above

Answer: D

168. The term "marginal field" refers to:

- A. A field that is not economically viable
- B. A field with small reserves that requires special incentives
- C. A field that is offshore
- D. A field that has been abandoned

Answer: B

169. What is the primary component of natural gas?

- A. Ethane
- B. Propane
- C. Methane
- D. Butane

Answer: C

170. Which organization is responsible for setting oil prices globally?

- A. World Bank
- B. IMF
- C. OPEC
- D. WTO

Answer: C

171. What is "flaring" in the oil and gas context?

- A. The controlled burning of natural gas
- B. The uncontrolled release of gas
- C. The process of refining oil
- D. The process of transporting oil

Answer: A

172. The "Greenhouse Effect" is caused primarily by:

- A. Oxygen
- B. Nitrogen
- C. Carbon dioxide
- D. Hydrogen

Answer: C

173. What is a "joint venture" in the oil and gas industry?

- A. A partnership between two or more companies to explore and produce oil
- B. A single company operating independently

- C. A government-owned company
- D. A non-profit organization

Answer: A

174. Which of the following is NOT a component of crude oil?

- A. Hydrocarbons
- B. Sulphur compounds
- C. Nitrogen compounds
- D. Silica

Answer: D

175. The "oil window" refers to:

- A. The depth and temperature range where oil is formed
- B. The time when oil is most profitable
- C. The period when oil prices are highest
- D. The opening in a drilling rig

Answer: A

176. What is "decommissioning" in the oil and gas industry?

- A. The process of retiring a well or facility
- B. The process of starting operations
- C. The process of increasing production
- D. The process of selling assets

Answer: A

177. Which of the following is a safety management system used in the oil and gas industry?

- A. ISO 9001
- B. ISO 14001
- C. OHSAS 18001/ISO 45001
- D. All of the above

Answer: D

178. The "SPDC" stands for:

- A. Shell Petroleum Development Company
- B. Standard Petroleum Development Company
- C. Shell Petroleum Distribution Company
- D. Standard Petroleum Distribution Company

Answer: A

179. What is the purpose of an environmental audit in the oil and gas industry?
- A. To ensure compliance with environmental regulations
 - B. To increase production
 - C. To reduce costs
 - D. To improve employee morale

Answer: A

180. Which of the following is a characteristic of a good reservoir rock?
- A. High porosity and high permeability
 - B. Low porosity and low permeability
 - C. High porosity and low permeability
 - D. Low porosity and high permeability

Answer: A

181. What is "pipeline integrity management"?
- A. Ensuring pipelines are safe and leak-free
 - B. Managing pipeline construction
 - C. Reducing pipeline costs
 - D. Increasing pipeline capacity

Answer: A

182. The term "brownfield" in oil and gas refers to:
- A. An existing field with ongoing production
 - B. A newly discovered field
 - C. A field that has been abandoned
 - D. A field that is offshore

Answer: A

183. What is "greenfield" in the oil and gas context?
- A. A new development in a previously undeveloped area
 - B. An environmentally friendly field
 - C. A field that produces green energy
 - D. A field with no oil reserves

Answer: A

184. Which of the following is a key performance indicator (KPI) in oil and gas production?
- A. Production rate
 - B. Cost per barrel
 - C. Safety performance

D. All of the above

Answer: D

185. What is "PMS" in the Nigerian context?

- A. Premium Motor Spirit
- B. Petroleum Management System
- C. Pipeline Monitoring System
- D. Production Management System

Answer: A

186. The "Nigerian Oil and Gas Industry Content Development Act" was enacted in:

- A. 2010
- B. 2015
- C. 2007
- D. 2018

Answer: A

187. What is the function of a "separator" in oil production?

- A. To separate oil, gas, and water
- B. To separate oil from sand
- C. To separate different types of oil
- D. To separate gas from air

Answer: A

188. Which of the following is an example of a renewable energy source?

- A. Solar power
- B. Natural gas
- C. Coal
- D. Oil

Answer: A

189. What is "energy security"?

- A. Ensuring reliable and affordable energy supply
- B. Reducing energy consumption
- C. Increasing oil production
- D. Exporting energy resources

Answer: A

190. The "DTI" in the oil and gas context stands for:

- A. Department of Trade and Industry
- B. Downstream Technical Inspection

- C. Development and Technology Initiative
- D. Drilling Technical Information

Answer: A

191. What is the difference between API gravity and specific gravity?
- A. API gravity is a measure of density relative to water; specific gravity is the same concept but expressed differently
 - B. API gravity is used for solids; specific gravity is used for liquids
 - C. There is no difference
 - D. API gravity measures volume; specific gravity measures mass

Answer: A

192. Which of the following is a common type of drilling rig?
- A. Jack-up rig
 - B. Semi-submersible rig
 - C. Drillship
 - D. All of the above

Answer: D

193. What is a "blowout preventer" (BOP)?
- A. A device used to prevent uncontrolled release of oil or gas
 - B. A device used to increase production
 - C. A device used to measure pressure
 - D. A device used to clean the wellbore

Answer: A

194. What is "well stimulation"?
- A. Techniques used to enhance production from a well
 - B. The process of drilling a well
 - C. The process of abandoning a well
 - D. The process of testing a well

Answer: A

195. What is the role of a "petroleum engineer"?
- A. To design and develop methods for extracting oil and gas
 - B. To market oil and gas products
 - C. To manage finances
 - D. To oversee environmental compliance

Answer: A

196. What is "seismic survey"?

- A. A method of exploring for oil and gas using sound waves
- B. A method of measuring oil production
- C. A method of transporting oil
- D. A method of refining oil

Answer: A

197. What is "produced water"?

- A. Water that is brought to the surface during oil and gas production
- B. Water used for drilling
- C. Water used in refineries
- D. Water that is injected into the reservoir

Answer: A

198. Which of the following is a major challenge facing the Nigerian oil and gas industry?

- A. Oil theft and pipeline vandalism
- B. Lack of oil reserves
- C. Lack of demand for oil
- D. Lack of technology

Answer: A

199. What is "global warming potential" (GWP)?

- A. A measure of how much a gas contributes to global warming
- B. A measure of oil reserves
- C. A measure of energy efficiency
- D. A measure of production capacity

Answer: A

200. The "Nigerian Gas Flare Commercialisation Programme" aims to:

- A. Reduce gas flaring by promoting commercial use of gas
- B. Increase gas flaring
- C. Reduce oil production
- D. Increase oil production

Answer: A
